## **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claim 1-30 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Claims 1, 11 and 21 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose <u>sending a</u> first feeler packet from a source node, sending a second feeler packet from a destination node, receiving the first and second feeler packet at an intermediate node, augmenting first and second feeler packets at an intermediate node, where node transit logs from the first and second feeler packets are combined to represent a path discovered for transmission from the source node to the destination node.

It is noted that the closest prior art Stewart (US 4747593) shows a process for transmitting a test packet from a source node to a destination node, and transmitting an acknowledgement packet from the destination node to the source node. Furthermore, Fenner (US 5095480) discloses using unique immutable identifiers for all network nodes to support a routing system requiring only these identifiers for routing from a source to a destination node.

However, Stewart and Fenner fail to disclose or render obvious the above underlined reasons for allowance.

Application/Control Number: 09/872,431

Art Unit: 2667

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Page 3

## Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- (a) Stewart (US 4747593) discloses a process of sending a test packet from a source to a destination node, and responding to the test packet with an acknowledging packet.

Application/Control Number: 09/872,431

Art Unit: 2667

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Grey whose telephone number is (571)272-3160. The examiner can normally be reached on 6:30-3:00.

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on (571)272-3179. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
